

Made Blue focus on providing water for all.

Working with ambassadors like Borg & Overström, Made Blue are an entrepreneurial charity who invest in water projects in countries where it is needed the most.

Access to clean water is the basis for a healthy and productive life, however 1 in 10 people still lack access to water.

Made Blue have made more than 15 billion litres of clean water available to those in need and you can help provide more.

borg &
overström

Give back with each glass from Borg & Overström.

For less than a cup of coffee, you can provide clean water for those in need. If you choose to donate £2.75 per dispenser on your order, Borg & Overström will match it.

This simple donation provides 19,000 litres of clean water, which is the average amount of water dispensed through a dispenser in its first five years. This ensures that every glass poured, is matched with a clean glass of water for someone in need.

Never drink alone with a Borg & Overström water dispenser.
